Canals filled with history, modern architecture on the IJ and a trendy harbour area – Amsterdam focuses on water. It was so already when the VOC ships chose the deep blue sea and it is still so today. If you want to really experience the city, you must go on the water.

### **KNOWLEDGE OF THE CITY**

It is the combination of tangible history in the form of canals, bridges and warehouses with futuristic buildings, huge cruise ships and brand-new hotspots that make Amsterdam a city of stories. Our guides are happy to tell you these stories. They know all about the historic city, from the infamous redlight district to the prestigious Golden bend on the Herengracht. With as much pleasure they tell you all about modern architecture and the latest developments along the shores of the IJ lake. Experience highlights such as the Skinny Bridge, centuries-old plaques, traditional hoisting hooks, churches and houseboats from the perspective of the canals. Because Amsterdam is beautiful and it's beauty is best seen from the water!
