

M/S Strömma Kanal

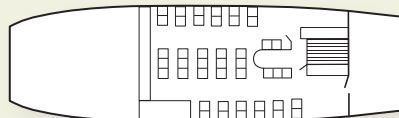

M/S Strömma Kanal was built in 1975 to operate in the narrow and shallow straits of the Strömma Canal, the inner sea lane between Stockholm and Sandhamn. The vessel's draught is no more than 1.1 metres, which makes her ideal for trips to islands and jetties in shallow waters. The ship has a bright and airy dining room and a lovely sundeck with seating. The dining room on the main deck has capacity for 80 seated guests, and for drinks parties there is space for 145 guests. The large windows offer fantastic views of our beautiful archipelago.

FACTS M/S STRÖMMA KANAL
